DC SSL VPN FOR MAC

An Installation Guide
This short guide will help you connect to the DC Network on a MAC from home.

If you haven’t done so already please go to http://dcftp.dc.edu and click on the link for the VPN program for either Windows or MAC.

Copy the VPN Client into the Applications folder on your MAC and double-click to install.

Once the client is installed you will go to the Applications folder to run the program.
Double-Click the Application and the following screen will open.

Click “Settings”
Fill in the following fields.
Server: vpn.dc.edu
User: firstname.lastname
Password: your windows password

Click “Done”
You will be brought back to the first screen now filled in with the information you just provided.

Click “Connect”.

Your connection will be initiated and a message will appear confirming success.

To connect to your “P” drive follow the directions below
From the desktop menu click "Go".

Click "Connect to Server"
Enter the information in “Server Address”

Click “Connect”
Enter your network credentials – your windows username and password from Dominican College.

Click “Connect”
You are now connected to your “P” drive.

Please contact the IT Department at 845-848-4049 with any questions.
